# DRY FOG FOR MUSHROOM CULTIVATION

FREESOL FARM

**"The AKIMist®E has been a game changer. It's the difference between constantly reacting to problems and actually controlling the environment."**

**-Founder of FreeSol Farm, Jacob Purcell**

## About FreeSol Farm

FreeSol Farm is a gourmet mushroom operation producing 50–100 pounds per week, with the capacity to scale to 200 pounds. Their mission is simple: to spread the belief that mushrooms are more than food, they are flavor, function, and philosophy.

## The Dry Fog Results

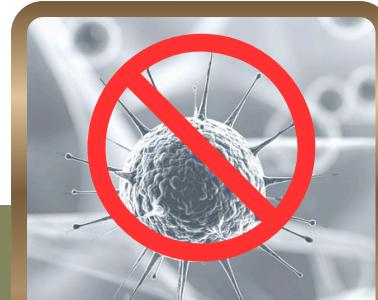

- ✓ Instant improvement in consistency and **crop health**
- ✓ Dramatically **reduced contamination** risk
- ✓ Mushrooms **doubled in size** overnight
- ✓ Uptime & **productivity** maintained
- ✓ Months of **investment protected**

**EASY INSTALL**

**STEADY GROWTH**

**CONTAMINATION  
RISK REDUCED**

# DRY FOG HUMIDIFIER

## AKIMIST®E

AKIMist®E is Ikeuchi's Dry Fog humidification system designed for precise, uniform humidity control. This ultra-fine fog technology enables consistent environmental management without wetting surfaces. The system is built for durability, low maintenance, and long-term performance.

Small, Uniform  
Droplets  
= Non-wetting

Energy & Water  
Efficient

Modular, Easy  
Maintenance System
